Executive Summary: Global Superstore generated \$12.64M in gross sales and \$1.47M in net profit over 4 fiscal years, expanding top-line revenue by 90.3% from 2011 (\$2.26M) to 2014 (\$4.30M). However, margin efficiency remained capped at 11.6% due to \$521.4K in avoidable profit destruction originating from un-governed discounting and the structurally unprofitable Tables line.

Profit Leak Diagnostic & Category Economics

Root-cause investigation of the -\$64,083 Tables deficit and discount margin erosion.

CRITICAL PROFIT LEAK DISCOVERY: STRUCTURAL DEFICIT IN TABLES SUB-CATEGORY
Across 17 product sub-categories, Tables generated -\$64,083.39 in net losses on \$757,041.90 sales. The primary driver is an aggressive 29.07% average discount rate combined with heavy freight delivery costs.

Logistics Fulfillment & Strategic Action Plan

Operational efficiency analysis and C-suite commercial roadmap.

4 Actionable Strategic Initiatives for Executive Leadership

1. Enforce Global Discount Guardrails Cap discretionary discounts at 15%. Require VP approval above 20%. Immediately eliminates \$220k+ in emerging market losses (Turkey, Nigeria, Netherlands).	2. Overhaul the 'Tables' Product Line Implement a mandatory bulky freight surcharge and +12% catalog price adjustment. Delist negative-margin SKUs with heavy freight.
3. Prioritize High-CLV B2B Corporate Accounts Corporate & Home Office accounts exhibit superior repeat order rates and margin stability (11.5%–12.0%). Deploy dedicated account executives.	4. Optimize Fulfillment Carrier Rate Cards Migrate low-priority replenishment orders to Standard Class (5-day cycle) to reduce expedited freight fees by ~\$11/order.
